Question 1:

Step 1:Categories of Users

- New customers with coupon
- New customers without a coupon
- Existing customers with a loyalty card and no coupon
- Existing customers without a loyalty card and no coupon
- Existing customers with a loyalty card and Coupon
- Existing customers without loyalty and with a coupon

Step 2:.Decision Table:

A	B	C	D	E
Written By	Sai Pragnehswar Reddy Sunnapu			
	Decision Table Testing			
	"Positive" in the table represents that particular discount should be given			
Type of Customer	10% Discount	15% Discount	20% Discount	No Discount
New customers with coupon			Positive	
New customers without a coupon		Positive		
Existing customers with a loyalty card and no coupon	Positive			
Existing customers without a loyalty card and no coupon				Positive
Existing customers with a loyalty card and Coupon			Positive	
Existing customers without loyalty and with a coupon	Positive		Positive	

Step 3: Test with the data of the given six categories of Users and give the Discount Given

Question 2:

The Article states that Ronnie's Auto plans to expand its business to the next town assuming its business is going well at the current location and we can conclude this by observing the fact that Jenny's beauty parlour used to make better profits at the former location. Therefore, the statement is strong

If the author had not mentioned the reason why Jenny is intending to change her location then we won't be able to conclude the reason why Ronnie's Auto is planning to expand its business to the next location and the statement would have been weak and no perfect conclusion can be given.

Question 3:
